needs funding.  
Please explain

Needs funding – replacement of computers in MS9 and MS10

**PLEASE NOTE: If you have multiple requests, please submit multiple forms.**

*Please share as many details as possible such as room location(s), type of equipment and/or software requested. If you have a cost estimate, that would be helpful, we will contact you for more details.*

*Please share as many details as possible such as room location(s), type of facilities request, remodel or construction request, safety concern, or furniture request.*

You will have an opportunity to present your request to the ISIT/FACILITIES OR CTE committee.

It is time to replace all the computers in MS9 and MS10 and faculty offices with new computers.

This is a regular process that occurs every three years due to the increased demand of software used by Industrial Drawing, Architecture, and Engineering.

All three programs share the computers and labs in MS9 and MS10.

The computers now in use in these rooms are usually distributed to faculty, labs, or other classrooms on campus.

If this request is not filled the three programs will be negatively affected by computers that fail due to demand and age.

There is a legitimate need for two new 80" Monitors and new Document Camera in MS12. The existing Short-Throw projector and Document Camera do not meet the needs of the courses taught in the room and are inadequate due the size of the room. (Funding to be from CTE or Strong Workforce)

I am requesting the following:
