I am requesting the following:

<p>Classroom H11 (Designated Economics classroom)</p> <p>We request that a stronger wifi signal be installed in the classroom/building.</p> <p>The request is to modify the existing wifi signal in the Humanities building for the H11 classroom. The current signal is extremely weak. In many instances, students are unable to connect their electronic devices to the internet due to the weak signal. This negatively impacts the learning environment, as many students need to connect their laptops, tablets, etc. to the internet to download course lectures, materials, and assignments during class. Furthermore, there are many web-based learning games (ex. Kahoot) I would like to play in class with my students, but am unable to because of the lack of reliable internet wifi connection for students.</p>
