Classrooms H-51 and H-15

Lighting concerns for Projector utilization.

Please re-wire the lighting in all of the classrooms in the following manner.

- When one 'switch' is turned off, all of the lights in the front of the class turn off.**
- When the other 'switch' is turned off, all of the lights in the rear of the class turn off.**

The current system staggers lights throughout the room, making the room uniformly 'dimmer'. However, this can lead to 'washed out' visual images when using the Digital Projector. This may make it harder for DSPS students with marginal visual acuity to discern the images. The above modification would leave the front of the room dark, for more visual contrast.
