

# CALIFORNIA COMMUNITY COLLEGES

## CHANCELLOR'S OFFICE

### **AB 705 (Irwin) - Seymour-Campbell Student Success Act of 2012: Assessment. Chapter 745, Statutes of 2017**

---

*AB 705 requires community college districts to maximize the probability that a student will enter and complete transfer-level coursework in math and English within a one-year timeframe by utilizing assessment measures that include high school performance to achieve this goal.*

#### ***What is the intent of AB 705?***

The text of this bill can be read in full [here](#). The Legislature provided a number of findings, and declarations to guide system and college implementation of this new law. Included in the findings and declarations, the Legislature noted:

- Assessment instruments and placement policies have serious implications for equity, since students of color are more likely to be placed into remedial courses; and, students placed into remediation are much less likely to reach their educational goals.
- Evidence suggests that community colleges are placing too many students into remediation and that many more students would complete transfer requirements in math and English if allowed to bypass remedial prerequisite courses and enroll directly in transfer-level English and math courses.
- The goal of AB 705 is to ensure that students are not placed into remedial courses that may delay or deter their educational progress unless evidence suggests they are highly unlikely to succeed in the college-level course.
- Community colleges are prohibited from requiring students to take a prerequisite course unless they are highly unlikely to succeed in a higher-level course without it, pursuant to Section 55003 of Title 5 of the California Code of Regulations, but this policy is not followed in practice.
- Colleges are required to use multiple measures in determining course placement, pursuant to Section 55522 of Title 5 of the California Code of Regulations, but Title 5 of the California Code of Regulations does not provide enough guidance in the use of multiple measures to ensure that students are not excluded from courses in which they can be successful.
- Evidence suggests that when used as the primary criterion for placement, assessment tests tend to under-place students; and, a student's high school performance is a much stronger predictor of success in transfer-level courses than standardized placement tests.

#### ***Will the CCCCCO provide guidance and definitions to colleges?***

AB 705 authorizes the CCC Board of Governors to establish regulations governing the use of high school performance and other measures, instruments, and placement models to ensure college implementation meets the goals of this legislation.

To advance this work, the Chancellor's Office will be assembling an AB 705 implementation team to assist with the guidance and practices associated with the legislation. The CCCCO is committed to ongoing support for colleges and keeping colleges informed about training and technical assistance available for successful multiple measures approaches, including providing information to explain how to access the training and technical assistance for upcoming assessments.

For now, additional information and background resources for various aspects of multiple measures and their use can be found on the Chancellor's Office [website](#).

***When does AB 705 become effective?***

AB 705 was signed by the Governor on October 13, 2017, and will take effect on January 1, 2018. While the statute becomes effective on January 1, 2018, the CCCCO will issue guidance that provides phased-in implementation. The CCCCO is committed to ongoing support for colleges and keeping colleges informed about training and technical assistance available for successful implementation of AB 705.

***What is a college required to do in placing a student under the provisions of AB 705?***

A college is required to maximize the probability that a student will enter and complete transfer-level coursework in English and math within a one-year timeframe, and use, in the placement of students into English and math courses in order to achieve this goal, one or more of the following measures:

- (a) High school coursework
- (b) High school grades
- (c) High school grade point average

***Is a college required to use multiple measures?***

Yes, a college is required to use multiple measures, and *may* do so in such a manner that either of the following occur:

- (a) Low performance on one measure may be offset by high performance on another measure. (Compensatory)
- (b) The student can demonstrate preparedness and thus bypass remediation based on any one measure. (Disjunctive)

Multiple measures must be used in a way that maximizes the probability that a student will enter and complete transfer-level coursework in English and math within a one-year timeframe.

***What if a college is unable to obtain or otherwise use high school performance information?***

When a college is unable to obtain high school transcript data, or when that data is not available or logistically problematic to use, a college may use:
