Artifact Assessment

To determine whether these artifacts did ask students to demonstrate knowledge or skills, the Assessment Committee assessed each artifact. To do so, Assessment members were split into teams and assigned artifacts to assess using a [rubric](#) developed by the committee. Assessment

Committee Co-Chair Faith Bradham compiled the results in [this spreadsheet](#). The results were overwhelmingly positive.

All 19 artifacts submitted met or exceeded expectations in asking students to demonstrate competency in a job-related skill or in a field of knowledge. No artifacts did not meet expectations for job-related skills and no artifacts did not meet expectations for a field of knowledge (Chart 1).

Chart 1

16 artifacts met or exceeded expectations for demonstrating competency in job-related skills (Chart 2) and 17 met or exceeded expectations for demonstrating competency in a field of knowledge (Chart 3). 14 artifacts met or exceeded expectations in both categories.
