

SLO Performance - By Department, Course, CSLO

Program: Industrial Technology

Date: 06/18/2018

Terms: Summer 2018, Spring 2018, Fall 2017

INDTB10: Occupational Readiness

Upon completion the student will be able to: Student Learning Outcome 1 - Academic and Career Planning Using the Bakersfield College catalog, students will identify themselves with the resources available to them through student services, academic planning, and learning assistance. Students will also research the programs, certificates, and degrees available, prepare a Student Educational Plan for the educational goal of their choice, and complete an Individual Education and Career Plan.

	N/A		Exceeds expectations		Meets expectations		Does not meet expectations		Total	
Summer 2018	0	0.00%	0	0.00%	0	0.00%	0	0.00%	0	0.00%
Spring 2018	2	4.44%	1	2.22%	27	60.00%	15	33.33%	45	100.00%
Fall 2017	9	16.67%	0	0.00%	27	50.00%	18	33.33%	54	100.00%
Totals	11	11.11%	1	1.01%	54	54.55%	33	33.33%	99	100.00%

Upon completion the student will be able to: Student Learning Outcome 2 - Industrial Safety Using the appropriate written resources, students will correctly identify the various federal and state safety standards and practices impacting their chosen profession, and communicate the personal protective equipment used in their profession, and list the essential fire safety and workplace safety precautions for workers in the Industrial Technology career cluster.

	N/A		Exceeds expectations		Meets expectations		Does not meet expectations		Total	
Summer 2018	0	0.00%	0	0.00%	0	0.00%	0	0.00%	0	0.00%

Totals	0	0.00%	0	0.00%	0	0.00%	0	0.00%	0	0.00%

Upon completion the student will be able to: Student Learning Outcome 4 – Employment-Seeking Skills and Resources Through written worksheets, organizers, and templates, students will assemble the materials for successful completion of job applications. Students will assemble the materials needed to successfully create an “Employment-Seeking Portfolio,” including the creation of a resume and cover letter. Students will be introduced to successful employment interview skills vis-a-vis their participation in related small and large group classroom activities , and demonstrate those skills through actual in-class interview practice. Students may also demonstrate their understanding of these skill sets by participating in a mock interview provided through the job placement center located on campus.

INDTB10: Industrial Technology Careers

1. Upon successful completion of the course, the student will be able to identify and assess personal characteristics such as personality, values, skills, and interests and understand how this information may integrate toward effective career and life decisions.

CSLO not included in any Assessment Rubric

2. Upon successful completion of the course, the student will be able to identify career specific and transferrable job skills and develop a relevant education plan.

CSLO not included in any Assessment Rubric

3. Upon successful completion of the course, the student will be able to identify appropriate and relevant information to successfully create their own resume and cover letter.

CSLO not included in any Assessment Rubric

4. Upon successful completion of the course, the student will be able to analyze several decision-making models and implement a specific model to make a career choice.

CSLO not included in any Assessment Rubric

INDTB274: Special Problems in Wood Working

Upon completion the student will be able to: Student Learning Outcome: The student, given proper instruction, will research and review various technical topics and describe the necessary tools, equipment and skill requirements. The student's knowledge and skill level will be demonstrated by achieving a minimum 70% score on all lab exercises and examinations as detailed in the "Petition for Individual Study" form. Objectives: A. In consultation with the instructor, the student will develop meaningful and clearly stated project objectives for the topic investigated. B. The student will explain orally and in writing the description of the specific problem to be investigated and be able to explain how this problem will assist them in enhancing their specific career goal. C. The student will demonstrate progress concerning the specific problem through written or oral reports submitted to the instructor.

	N/A		Exceeds expectations		Meets expectations		Does not meet expectations		Total

Upon completion the student will be able to: Communication in the English Language and Critical Thinking (6 units) Courses in language and rationality are those which develop for the student the principles and applications of language toward logical thought, clear and precise expression, and critical evaluation of communication. Take 3 units in oral communication and 3 units in written communication. A.1 Oral Communication 1. Form and present informative persuasive messages. 2. Demonstrate competence in both active and empathic listening. 3. Present oral messages to appropriate audiences and adhere to conventions of message delivery. 4. Manage personal communication apprehension and anxiety. A.2 Written Communication 1. Identify the controlling idea and the main points of college-level expository and argumentative essays. 2. Evaluate expository and argumentative essays through the application of critical thinking techniques. 3. Write logical and coherent expository and argumentative essays, summaries and paraphrases using correctly the standard conventions of written English. A.3 Critical Thinking (Critical thinking is the rational and reflective process of making and supporting judgments.) 1. Make judgments that skillfully interpret information and phenomena. 2. Skillfully support judgments. 3. Identify and skillfully explore assumptions, implications, and alternatives to judgments. 4. Identify and differentiate statements of opinion, matters of fact, and arguments. 5. Analyze arguments into supporting judgments and supported judgments. 6. Skillfully evaluate judgments. 7. Skillfully evaluate the support for judgments.

Upon completion the student will be able to:Physical Universe and Life Forms (6 units) Courses in the natural sciences are those that examine the physical universe, its life forms, and its natural phenomena. Further, courses in the natural sciences help the student develop an appreciation and understanding of the scientific method. Courses in the natural sciences, math and logic help students apply logical, qualitative and quantitative reasoning in solving problems or analyzing arguments. Take 3 units in Natural Sciences and 3 units in Math and Logic. B.1 Natural Sciences 1. Demonstrate a knowledge of natural phenomena and recognize the processes that explain them. 2. Demonstrate a knowledge of scientific methodologies when solving a problem. B.2. Mathematics and Logic (Analytical Thinking) 1. Apply formal systems of reasoning in solving problems or analyzing arguments.

Upon completion the student will be able to: **Social, Political, Legal, and Economic Institution and Behavior: Historical Background: (9 units for AA; 6 units for AS) Courses in the social and behavioral sciences are those which focus on people as individuals and as members of society. The courses will help the student develop an understanding of the methods of inquiry used by the social and behavioral sciences. For an AA Degree, take three units from American History and Politics, and three units from Other Social Science Courses, and 3 units from Behavioral Science. For the AS Degree, take three units from American History and Politics, or from Other Social Science Courses, and three units from Behavioral Science. 1. Demonstrate an understanding of the perspectives, theories, methods and core concepts of the social and behavioral sciences. 2. Explain the major problems and issues in the disciplines in their contemporary, historical and geographical contexts. 3. Demonstrate an understanding and appreciation of the contributions and perspectives of women, ethnic and other minorities, and Western and non-Western peoples.**
