

Vocational Nursing Assessment Plan Rev. 9/16/2018

Vocational Nursing	16-17	17-18	18-19	19-20	20-21	21-22
--------------------	-------	-------	-------	-------	-------	-------

**VNRSB67 - Principles of Pharmacology**

• 1. Upon completion the student will be able to: Identify principles and methods of safe medication administration when caring for adult, elderly, and dependent clients.			P	P	P	
• 2. Upon completion the student will be able to: Accurately calculate drug dosages.			P		P	
• 3. Upon completion the student will be able to: Explain the use of specific drugs in the treatment of health alterations.			P		P	P
• 4. Upon completion the student will be able to: Identify normal and adverse responses by the client to drug therapy.			P			
• 5. Upon completion the student will be able to: Employ the nursing process and teaching-learning principles to educate the adult, elderly, and dependent client about their drug therapy.			P			P
• 6. Upon completion the student will be able to: Discuss potential liabilities for the nurse administering medications.			P	P		P

**VNRSB68 - Basic Medical Surgical Nursing Practice**

• 1. Upon completion the student will be able to: Describe the pathophysiology for clients with medical-surgical problems of the gastrointestinal, integumentary, upper respiratory, neurosensory (eyes and ears) and genitourinary systems.			P		P	P
• 2. Upon completion the student will be able to: Utilize the nursing process to develop a plan of care for the patient experiencing medical-surgical problems of the gastrointestinal, integumentary, upper respiratory, neurosensory (eyes and ears) and genitourinary systems.			P			
• 3. Upon completion the student will be able to: Identify laboratory and diagnostic tests used to diagnose clients with medical-surgical problems of the gastrointestinal, integumentary, upper respiratory, neurosensory (eyes and ears) and genitourinary systems.			P			
• 4. Upon completion the student will be able to: Utilize the nursing process, to describe the plan of care for a patient with fluid, electrolytes, or acid base disorders.			P			
• 5. Upon completion the student will be able to: Discuss nursing implications for clients taking prescribed medication for medical-surgical problems of the gastrointestinal, integumentary, upper respiratory, neurosensory (eyes and ears) and genitourinary systems.				P		P
• 6. Upon completion the student will be able to: Identify the psychosocial needs of the clients and families with medical-surgical problems of the gastrointestinal, integumentary, upper respiratory, neurosensory (eyes and ears) and genitourinary systems.				P		P

**VNRSB69 - Foundations for Vocational Nursing Practice**

• 1. Upon completion the student will be able to: Identify the steps of the nursing process.				P	P	
• 2. Upon completion the student will be able to: Utilize the nursing process to identify the concepts and skills needed to provide safe nursing care.					P	
• 3. Upon completion the student will be able to: Employ the nursing process and teaching-learning principles to develop a plan of care for adult clients with basic health needs.			P		P	
• 4. Upon completion the student will be able to: Discuss the responsibilities of the vocational nurse in providing quality care within the legal and ethical boundaries of nursing.			P			P
• 5. Upon completion the student will be able to: Demonstrate appropriate communication strategies when dealing with adult clients with basic health needs.			P			P

**VNRSB69L - Foundations for Vocational Nursing Practice Lab**

• 1. Upon completion the student will be able to: Demonstrate fundamental nursing skills.			P		P	
• 2. Upon completion the student will be able to: Safely administer medications.			P		P	
• 3. Upon completion the student will be able to: Provide safe nursing care to a client with basic health needs as characterized by: • the ability to collect and organize patient information, • collaborate in the development and implementation of nursing care plans, • establish therapeutic nurse/patient relationships, • demonstrate respect for diverse cultures, • prioritize aspects of basic care, • utilize routine types of equipment during care delivery			P			P
• 4. Upon completion the student will be able to: Develop a teaching plan for the client and/or family.				P		P

Vocational Nursing Assessment Plan Rev. 9/16/2018

Vocational Nursing	16-17	17-18	18-19	19-20	20-21	21-22
--------------------	-------	-------	-------	-------	-------	-------

**VNRSB79 - Intermediate Medical Surgical Nursing**

• 1. Upon completion the student will be able to: Differentiate between a comprehensive assessment and a focused assessment.			P		P	
• 2. Upon completion the student will be able to: Identify alterations in the physical, spiritual, and psychological status of the client with medical-surgical illness.			P		P	
• 3. Upon completion the student will be able to: Compare and contrast the socioeconomic, cultural and demographic differences of clients and develop a comprehensive plan of care for clients with medical-surgical and mental health disorders.			P		P	
• 4. Upon completion the student will be able to: Describe the pathophysiology for a variety of medical surgical diagnoses.			P			P
• 5. Upon completion the student will be able to: Discuss the assessment data and nursing interventions for clients with medical-surgical and mental health disorders.			P			P
• 6. Upon completion the student will be able to: Describe the pharmacological and non-pharmacological interventions for clients with medical-surgical and mental health disorders.			P			P
• 7. Upon completion the student will be able to: Identify laboratory and diagnostic tests used to diagnose medical-surgical and mental health disorders.	C			P		
• 8. Upon completion the student will be able to: Explain nursing implications for medications and treatments prescribed for clients with medical-surgical and mental health disorders.	C			P		
• 9. Upon completion the student will be able to: Discuss the roles of the nurse as a client educator and advocate.	C			P		

**VNRSB79L - Intermediate Medical Surgical Nursing Lab**

• 1. Upon completion the student will be able to: Perform a comprehensive and focused assessment on assigned clients in the medical surgical and rehabilitation settings.		C			P	
• 2. Upon completion the student will be able to: Assess the physical, spiritual, and psychological status of clients in the medical surgical and rehabilitation settings.		C			P	
• 3. Upon completion the student will be able to: Utilize the nursing process to develop and implement a comprehensive plan of care for clients in the medical surgical and rehabilitation settings.		C			P	
• 4. Upon completion the student will be able to: Demonstrate critical thinking and problem solving skills when caring for clients with various diagnoses.		C	P			P
• 5. Upon completion the student will be able to: Administer medications to a team of clients utilizing the six rights of drug administration.		C	P			P
• 3. Upon completion the student will be able to: Demonstrate the ability to prioritize nursing care while managing a group of clients.		C	P			P
• 7. Upon completion the student will be able to: Identify appropriate community resources to provide continuity of care.		C		P		
• 8. Upon completion the student will be able to: Utilize effective communication skills to communicate client information (normal and abnormal findings) to health team members.		C		P		
• 9. Upon completion the student will be able to: Describe and demonstrate the roles of client educator and client advocate.		C		P		

**VNRSB83 - Critical Thinking and Leadership for the Vocational Nurse**

• Upon completion the student will be able to: Establish the relationship between critical thinking, clinical reasoning and nursing care.				P	P	
• Upon completion the student will be able to: Demonstrate critical thinking and clinical reasoning skills during clinical simulations, role playing, and/or case study activities.			P			
• Upon completion the student will be able to: Compare and contrast the characteristics and roles of leaders and managers.			P			
• Upon completion the student will be able to: Discuss the VN scope of practice focusing on delegation and supervision.	C					
• Upon completion the student will be able to: Identify strategies for effective communication in leadership, management, and conflict resolution.						P
• Upon completion the student will be able to: Discuss and demonstrate the principles of teambuilding.					P	

Vocational Nursing Assessment Plan Rev. 9/16/2018

Vocational Nursing	16-17	17-18	18-19	19-20	20-21	21-22
<b>VNRSB84 - Maternal Child Pharmacology</b>						
• Upon completion the student will be able to: Identify common medications administered to the maternal/child and pediatric populations.		C			P	
• Upon completion the student will be able to: Compare and contrast adverse effects of medications commonly used for the maternal/child and pediatric client.		C				P
• Upon completion the student will be able to: Discuss appropriate nursing implications necessary when administering medications to parent/newborn and pediatric clients.		C	P			P
• Upon completion the student will be able to: Perform correct dosage calculations for all routes of medications administered to maternal/child and pediatric clients.		C	P		P	
• Upon completion the student will be able to: Evaluate common laboratory values and explain their relationship to medications.	C	C		P		
<b>VNRSB88 - Maternal Child Nursing</b>						
• Upon completion the student will be able to: Describe growth and development stages from infancy through adolescence.		C			P	
• Upon completion the student will be able to: Discuss age appropriate communication techniques for the pediatric client.		C			P	
• Upon completion the student will be able to: Discuss effective communication techniques for the maternal/child client and their families.	C		P			P
• Upon completion the student will be able to: Explain the pathophysiology, clinical manifestations, and nursing interventions for common respiratory, musculoskeletal, nutrition, cardiovascular, and hematological disorders in the pediatric client.	C		P			P
• Upon completion the student will be able to: Compare and contrast the various medical complications associated with pregnancy.			P			P
• Upon completion the student will be able to: Utilize the nursing process as a framework for discussing the expected plan of care for parent/ newborn, pediatric clients, and their families with predictable and unpredictable outcomes related to various disease states.			P		P	
• Upon completion the student will be able to: Identify stressors of illness and hospitalization for children and families and discuss effective nursing interventions.	C			P		
• Upon completion the student will be able to: Discuss the process for development and implementation of teaching plans for parent/ newborn, and pediatric clients and/or their families.	C	C		P		
<b>VNRSB88L - Maternal Child Nursing Lab</b>						
• Upon completion the student will be able to: Perform a physical assessment on clients during the states of antepartum, intrapartum and postpartum.		C			P	
• Upon completion the student will be able to: Identify appropriate community resources for maternal/child and pediatric clients and their families.		C			P	
• Upon completion the student will be able to: Perform a physical assessment on a newborn and pediatric client.		C			P	
• Upon completion the student will be able to: Utilize principles of normal growth and development to assist children of various ages cope with hospitalization.			P			P
• Upon completion the student will be able to: Employ effective interventions for maternal/child clients, pediatric clients and their families with predictable and unpredictable outcomes related to various disease states.			P			P
• Upon completion the student will be able to: Evaluate the effectiveness of the interventions used to manage the care for parent/ newborn and pediatric clients and their families.			P			P
• Upon completion the student will be able to: Demonstrate the ability to use critical thinking skills when caring for maternal/child and pediatric clients with various medical diagnoses.			P			P
• Upon completion the student will be able to: Participate in the development of a comprehensive care plan for a pediatric client with various medical diagnoses and for the client in various stages of pregnancy.	C			P		
• Upon completion the student will be able to: Identify teaching needs of the maternal/child and pediatric client and their families.	C			P		
• Upon completion the student will be able to: Safely administer medications to maternal/child and pediatric clients utilizing the 6 rights of medication administration.	C			P		

Vocational Nursing Assessment Plan Rev. 9/16/2018

Vocational Nursing	16-17	17-18	18-19	19-20	20-21	21-22
<b>VNRSB89 - Advanced Medical Surgical Nursing</b>						
• Upon completion the student will be able to: Differentiate between indications for a comprehensive assessment and a focused assessment.		C			P	
• Upon completion the student will be able to: Compare and Contrast alterations in the physical, spiritual, and psychological status of the stable client with the client in crisis.		C			P	
• Upon completion the student will be able to: Describe the pathophysiology for a variety of medical surgical diagnoses.		C			P	
• Upon completion the student will be able to: Discuss the assessment data and nursing interventions necessary to develop a plan of care for clients with medical and psychiatric emergent crisis.		C	P			P
• Upon completion the student will be able to: Describe the pharmacological and non-pharmacological interventions for clients with medical and psychiatric crisis.		C	P			P
• Upon completion the student will be able to: Identify laboratory and diagnostic tests used to diagnose clients in medical and psychiatric crisis.		C	P			P
• Upon completion the student will be able to: Explain nursing implications for medications and treatments prescribed for clients with medical-surgical and mental health disorders.	C	C		P		
• Upon completion the student will be able to: Correlate patterns of change in status for the client with an impending medical or psychiatric crisis.	C	C		P		
• Upon completion the student will be able to: Discuss the roles of the nurse as a client educator and advocate.	C	C		P		

<b>VNRSB89L - Advanced Medical Surgical Nursing Lab</b>						
• Upon completion the student will be able to: Perform a comprehensive and focused assessment on clients with an emphasis on clients with complex medical conditions.		C			P	
• Upon completion the student will be able to: Describe and demonstrate the roles of client educator and client advocate.			P		P	
• Upon completion the student will be able to: Assesses and document the physical, spiritual, and psychological status of clients in crisis.		C			P	
• Upon completion the student will be able to: Utilize the nursing process to collaborate with health team members in the development of a comprehensive plan of care for clients in crisis.			P			P
• Upon completion the student will be able to: Demonstrate critical thinking and problem solving skills when caring for clients in crisis.		C	P			P
• Upon completion the student will be able to: Administer medications to a team of clients utilizing the six rights of drug administration.			P			P
• Upon completion the student will be able to: Demonstrate the ability to prioritize nursing care while managing a group of clients.	C	C		P		
• Upon completion the student will be able to: Demonstrate the ability to identify changes in client status and provide appropriate intervention prior to a medical and/or psychiatric crisis.	C			P		
• Upon completion the student will be able to: Identify appropriate community resources to provide continuity of care.	C			P		
• Upon completion the student will be able to: Employ effective communication skills to communicate client information (normal and abnormal findings) to health team members.	C			P
