

Alan Marin Letter of Intent

1. Why am i interested in running for BCSGA?

I have been on campus for about 3 years now and I during my time here at BC I have spent a lot of it participating in clubs, attending events, interacting with faculty, and overall just being apart of the BC campus. After serving in officer positions for several clubs on campus including the Computer Science and Japanese Culture Clubs, I have curated a passion for helping others and being a part of greater goal. I believe that working with the BCSGA organization will help me fulfill my passion for helping others.

2. What skills do you have to be successful in this position?

I possess highly developed technical skills and team-based organization skills. Working on my software engineering internship for the past 2 years has helped me hone my ability to communicate effectively within a team. Also, I have developed mentoring and leadership skills. For example, I have mentored students during Hackathons at BC and CSUB and also my coworkers who were new to the software engineering jobs, since I was leading the iOS development team as part of the internship. I have effectively served as a team lead for the iOS team while communicating with my supervisor about project goals.

3. Why does Bakersfield College have a student government?

BC has a student government that oversees all the student's on the BC campus. The SGA exists to help advocate for every student's interest while helping support all of the campus club's and events that help increase quality of student life here at BC.

Effectively, SGA continues to improve overall quality of life for students on campus by providing food, events, activities, and clubs for all students to be a part of and have pride in being a Renegade.

4. What will you bring to the BC Renegade Community?

I will bring technical expertise that will help create efficient workflows and organization amongst all of SGA. I will also bring my creative solutions and help get ideas going in order to bring them to life in the quickest and most efficient way possible.

Most importantly, I will bring my ambitious and passionate attitude for solving problems and creating solutions for things that need to get done, helping students and faculty on the BC campus and within SGA.
