

Letter of Intent

I want to be become a part of BCSGA because I have always loved being a leader. It allows me to learn so much more about those around me, because I am their voice. I have been in student leadership three out of the four years at my high school. In those three years I was constantly asking around, 'hey, what did you think of this event?' and 'what could have made it more enjoyable?' I was always curious as to how to make events better for everyone, and applied the feedback to the way our next event was planned. I did this because, to many, school is a place where many can forget what's going on at home and I wanted those people to be able to enjoy the events I helped organize. I believe BC has a student government to voice the opinion of the students and push for the changes they want and need. Given I am very young, I can understand a huge population here at BC. I have a very open mind and not hesitant to speak the opinion of the majority.
