### Tips for completing the Assessment Report:

1. Share copies of the assessment instrument, the rubric and the data report with those involved in the discussion. (The majority of full and part-time faculty who typically teach the course should be involved in this discussion.)
2. Plan a meeting to discuss the process, materials and results. (You may want to use a department meeting.)
3. Discuss the assessment materials, the course, and the results using the suggested discussion questions below or other questions you might develop.
4. Based on your discussion, record the information on the assessment report.

#### Suggested Discussion Questions

##### **Student Learning Outcomes:**

- Were the learning outcomes that were assessed core outcomes for the course; that is, did they describe the kind of analytical or critical thinking, or skills and abilities, that the discipline feels all successful students should take away from the course?
- Were students made aware of these learning outcomes prior to the assessment, and if so how?

##### **Assessment Instrument:**

- Did the assessment questions or assignments assess the learning outcomes; that is, did student performance on these provide strong information about how well students achieved the learning outcomes?
- Were the assessment questions or assignments clearly worded?
- Do classroom experiences align with or support the intended outcomes and the assessment, so that students are prepared to succeed?

##### **Assessment Rubric (If applicable):**

- For assessment questions that weren't objective in nature, e.g., multiple choice or fill in the blank, was your scoring rubric clear and easy to apply?
- Did the rubric adequately reflect the standards that your discipline adheres to?

##### **Assessment Process:**

- Was communication about the expectations of the process clear and early enough to all instructors who participated in the full-scale implementation?
- Was the assessment administered with reasonable uniformity across all sections; e.g., approximately the same timeframe of the semester, similar explanations to students, etc.
- Did instructors understand how to enter data into the scoring spreadsheets?

##### **Assessment Results:**

- What do the assessment results say about how well all students, or particular subgroups of students based on the data breakouts, achieve the intended learning outcomes?
- Are there new or different things that the discipline thinks would be worth trying that might improve future results?
- Is there additional analysis of the existing data that might provide greater insight into the meaning of the results?
