Letter of Intent for Student Orgs Funding Manager

I, Cecil Dexter, am applying for this position because I am a member of a few student organizations on campus and I would like to be a part in helping the student organizations run smoothly on campus. Student Organizations are an incredible feature on campus, for many reasons spanning from connecting you to invaluable resources that will be useful in career development to providing friends for life who have similar interests and passions to you. I believe that I will be good in this position due to my experience being in a student organization, as well as my experience handling funds in previous jobs I've had- Taco Bell, Subway, and FIELD Recycling Center, all positions where I was directly responsible for accounting for funds.

Bakersfield College has a student government because it is vitally important that student voices be heard. In a college setting, everything on campus is set up to help students succeed, and without student government students' voices would not be heard as clearly. Student government is put in place to have student advocacy for students, and it's an incredibly important job to take on.
