

I am interested in running for BCSGA because I know that I can make a difference by continuing with the progress which has been a motivation for me. I am eager to continue the work that has begun in the Office of Director of Student Organizations by working closely with the Director of Student Life and involving the SGA senators in club activities. I was involved in Student Government while I was in high school and I viewed it as my civic responsibility to lend my talents and credibility to my school and to my fellow students. I was trained in leadership from an early age. I attained the rank of Cadet Captain and became the logistics officer for my brigade in the eighth grade. When I started working at the age of 15, I was promoted to assistant manager as soon as I turned 18 and I have been promoted quickly in almost every job I have held. I am exceptionally skilled with computers and I am majoring in computer science. During high school, I was a member of the Junior Statesmen of America and I am very comfortable with public speaking and persuasion. I organized the first Computer Science Club at Bakersfield College and I currently serve as its President. I still view service as my civic responsibility and I want to serve the students (and faculty) of Bakersfield College by promoting clubs and organizations so that students are able to become leaders in society and their chosen fields. I am an achiever who rarely gives up. I am capable of leading discussions and delegating responsibilities. I excel at logistical planning and I empower others to exceed their own expectations. BCSGA exists so that the students of Bakersfield College are represented by their peers to communicate their needs and desires to the Board of Governors and the Community College District.
