

I am applying for a BCSGA Senator position because throughout my time here at Bakersfield College I have noticed a lack of student involvement and school pride. By getting involved I can assist in bringing new eyes and ears to BCSGA. I have connections with students who also have issues with finding ways to get involved on campus. I can speak for those students who feel like their voices goes unheard over others. I will be the bridge between BCSGA and these students.

I would like to help address issues like student safety on campus especially with more attacks happening on school campuses. I have the ability to be a successful senator because I'm very straightforward, not afraid to tackle tough tasks and issues. I'm here to serve the students of Bakersfield College. A student government is needed because it gives the student body a voice. It's the student government's responsibility to assist the students and taking their voice and turning it onto actions and policies. A student government also must help in making the academic lives enjoyable and easier transition from high school to college.
