

Hello!

I am interested in the Activities Manager position to get further involved in SGA, and be a part of the student activities department. I believe that the Student Activities department, as all other departments within the student body, are crucial for creating a balanced and successful foundation that allows students to know that we are here for them. College can be stressful and challenging, but it can also be so exciting and rewarding! That is why I believe the activities on campus allow students to take a break from their responsibilities of school work or work in general. I want to be able to aid the amazing events we have planned this year, and am ecstatic for it. I believe that I have the energy, motivation and overall reliability to show up to events and be the second in hand to the current Director of Student Activities. Given that this is my second and last year here at Bakersfield College I plan to get as involved as I can before I transfer to a 4-year university

I believe that I have the necessary skills needed for this position: effective communication, adaptability, collaboration, and organizational skills. Beyond that, the Activities Manager position relies on the needed support brought by the Director of Student Activities which I plan to help. Having been a Senator thus far, I am confident in my ability for what this position asks for. I believe that I catch onto the role of positions quickly when having the opportunity to connect with those leaders, as Senators have with the Vice President.

Bakersfield College has a student government to act as a voice for the student population and really implement what it is that students need, want, and have concerns of. It's the fundamental block to have successful and motivated students who complete their education through those roadblocks.

Sincerely,

Liz Diaz
