

1. I would like to join BCSGA because there are a couple of vacant spots and the students of BC can achieve a higher level of representation with more spots filled in. Just like I'm sure with any other member in the student government do, I'm sure I can bring an at least somewhat different perspective to the group.
2. I know how to listen to people and take their views into consideration. I like to think I know how to make people feel heard and let them know they're in a space where they feel safe to speak. I'm the past I've also been a couple of leadership positions, most recently as the VP of the Bakersfield College consent project.
3. Bakersfield College needs a student government because the students of BC need/should have the ability to represent themselves. They are going to be the ones to make the most reasonable and responsive decisions for the students. Because who knows the students better than the students themselves?
4. I would like to bring openness and passion to the renegade community. Also potentially resources to those who need it. If elected, I will do my part in making sure we at least get closer to that.
