Mathew Frazer
BCSGA President 2016 - 2017
Bakersfield College Student Government Association
1801 Panorama Drive
Bakersfield, CA 93305

Dear Mr. President,

Let me begin by thanking you for approaching me with the opportunity of joining our Bakersfield College Student Government Association. I am honored to be personally invited by the BCSGA President himself, and have decided to accept your invitation. Ecstatic about representing the student body as Activities Manager, I look forward to it.

Because I understand the struggle of being a college student, an employee, and a responsible adult, I want to assist our Renegades in looking past the stigma of "all work, and no fun" in community college. I plan to join the Director of Activities in the hopes of recreating a new fun-filled, thrilling, and educational atmosphere for our Renegades. College is more than a place to receive further education; it can also become a wonderful place that allows individuals' ideas to grow, allowing them to enjoy learning. Planning major, reoccurring, significant events will draw in huge crowds, which create a wonderful opportunity for students to gain networking skills with other students, staff, and community vendors: This helps students develop and grow as individuals who will carry these skills in and out of the Bakersfield College Community. I will take on any task that entails helping out our fellow students by hosting fun-ducational opportunities, thus broadening their college experience here at our campus – this way, the Renegade Pride we have once forgotten, will be rekindled within students even after they sprout out of our campus.

Having accumulated many skills throughout various volunteer and leadership experiences, I plan to serve the students by communicating with them first hand, and finding new ways to promote for our campus events by seeking feedback and solutions to help boost our student pride. I am also prepared to get down and dirty when it comes to cleaning up after our successful fun-ctions. If there are any ideas, suggestions, or critiques, do not hesitate to involve me n them. I believe that we must break down communication barriers and allow our minds to be open to new and wondrous possibilities.

Sincerely,

Ian Juarez
