Letter of Intent

For as long as I have had professional ambitions I have wanted to hold public office. As a child I was like any other kid, I wanted to be the President of the United States. However, I stuck with this ambition, I am extremely interested in politics and the policy making process. I strictly follow politics and the current political, economical, and social climate of our country and spend much time forming my own opinions on critical matters. I am a strong leader as I have been involved in many leadership positions throughout my life, notably I was the Chief Marketing Officer for Centennial High School's Virtual Business program placing fifth at the national competition in New York City. In high school I founded the second largest club at my school, Word of the Week Club, as the President, and as the only officer of this club I was responsible for every function, fundraiser, and event put on by the club. I am interested in the position of Senator on the Bakersfield College Student Government Association for many reasons, first and foremost I believe I can make the school a better place. Through listening to our student body and the values they hold, I can help make a real tangible difference that will leave a positive legacy for years to come. I am also interested in student government for the unique educational opportunity it presents. To be this hands on with a scaled version of our own government is a priceless opportunity that will help me both personally in my views and professionally in my ambitions.
