	Poster presentation at end of class lifespan case study.			

**PLOs:**

1. This course is a stand-alone course and is only mapped to the ILO's.

**ILOs:**

- I. Think critically to compare basic components of the theorists.
- II. Identify key milestones in physical growth and development of the systems.
- III. Demonstrate knowledge of basic health and safety issues related to each stage of the lifecycle.
- IV. Think critically about the aging process and cultural attitudes across the lifespan and application to the medical field.
