

## Letter of Intent

I am interested in being appointed to the positions of Director of Finance and Director of Legislative Affairs because I have taken an interest in being more involved in my school. This position will challenge me to work harder as a person and engage me with more of my peers. I know I will be successful in this position because I have always pushed myself to face tough decisions by weighing my decisions with their potential outcomes, and to never be hasty when making a decision. I have been involved and worked with money through raising money at the Kern County fair, I have done all my own budgeting to pay for college and my other other bills, and I have handled cash at registers at my work. Through this I have learned the value of money and that it is not just a number used to trade for pleasure. Instead it is a value that can determine a person or organizations potential to continue advancing, but the way it is spent to advance may vary depending on the user.

Bakersfield College has a student government because it allows the students to become closely related to their school. Students may not be able to relate to the faculty as the semester starts up or may not be interested when their professor is promoting an upcoming event. When students see a group of other students as leaders on the campus and actively participating with these events they feel more associated to the event as well. Student government allows the rest of the BC students to build a relationship to the school rather than simply walking class to class.
