

Michael Anthony de Tomaso

I'll confess, I'm a N(o)(o)B here @ BC. Nevertheless @ 63, I'm prime to use my life's credits to facilitate & embitter the lives of the student populous, individually and corporately, etc. for example, I dialog with everybody I meet, & would share a cup of tea, given the Time & Materials ... In my brief sojourn @ BC since Spring 2017. I met dozens of Individuals, such as a beautiful black Lab, named Sergeant, who's unspoken name is Nigel, says, Marion who was the very last adoptee out of Romania, & listened to him express concerns about the Tests Process & prep procedures for taking such exams in braille & the Time LAG of services, etc. while envisioning a possible solution using the current facilities & resources already available here on this campus. Ask me how...
