

Letter of Intent

I am interested in being appointed to the position of student activities manager because I have participated in student government during my high school years. I want to stay involved and use the skills I have developed to make BC a great place for students. My first experience in high school started off as junior class representative. I moved forward and by the end of my high school years I was senior class president and team captain of the basketball team along with president of two clubs. As a team captain and member I have the ability to work well in situations that ask for time, patience, and hard work. Another aspect to my work as president was having to constantly speak in front of peers and teachers which has sharpened my communication skills. I am also a good listener and note taker and am able to stay very organized. I believe Bakersfield College has a student government to give students the opportunity to feel part of the schools community. Having a student government lets students the opportunity to decide for themselves and give them a voice.
