Department

If you have multiple requests, please submit multiple forms.

Please share as many details as possible such as room location(s), type of equipment and/or software requested. If you have a cost estimate, that would be helpful, we will contact you for more details.

You will have an opportunity to present your request to the ISIT committee.

I am requesting the following technology or software:

FACE 12, 20, 23 and 15 need new computers that work more efficiently for accessing, on-line publisher materials, memory/thumb drives, and on-line presentations by both students and faculty. Students/faculty need the software or components necessary to allow video links to effectively run during Prezi or PowerPoint presentations. The computer DVD programs need to be updated/replaced to effectively run DVDs along with closed-captioning. The speakers need to be replaced or adjusted to bring up the volume (especially FACE 12).

A technology overhaul is needed in FACE 12, 15, 20, and 23. The chdv faculty need new updated computers and computer cabinets in all FACE building classrooms (FACE 12, 15, 20, & 23. This is necessary for effective instruction. New projector screens are needed in the classrooms for clear viewing to replace marked up screens.

Inadequate equipment/technology inhibits student learning. Having up to date technology enables faculty to teach in the most effective ways and allows the technology to be used by many students, thus enhancing student learning.

I-pads and the Learning Genie software are being used in the workforce for documenting children's growth and development. Having I-pads along with the Learning Genie software enhances chdv teaching practices and gives students necessary skill attainment for the field. Enough I-pads (approximately 72-112) with software to use with students in the f2f Observation and Assessment Course and the Field Experience course would be beneficial for student learning.
