So much of our work ties back to our Mission Statement and Core Values that helping people connect with that better would be an incredibly valuable training. I would also like to see robust and specific diversity/equity/inclusion training. There should be several trainings and not just one that lumps everything together. For example, safe space training, anti-racism training, how to have race conversations in classrooms, how to acknowledge systemic injustices, how to mold our efforts to lower socioeconomic status students, etc.
