

Being a student myself, I know what college entails and that it can be hard to have your voice heard at a collegiate level. I'm interested in representing the students on a larger scale and passing legislation that would be beneficial to those who also attend Bakersfield College. I possess leadership experience I believe will make me successful in this position, from being team captain of my swim team in high school, to being involved in my high school student government. I held a position on School Site Council, my responsibilities entailed coming up with surveys or just going up to students and asking them what my school could do to better their high school experience. I am a very organized, hardworking student and always looking for new learning opportunities and a chance to actually make a difference. Bakersfield College Student Govt. was established to help the students have a voice and representation with an abundance of problems facing the campus.
