

The Korean Culture Club's second annual Korean Culture Festival will reinforce the club's mission by giving BC students, faculty, and community members the opportunity to learn about Korea, especially its language, history, culture, and food. This bolsters the club's efforts to engage the BC student body and promote a broader sense of cultural competency. This festival will directly contribute to the college's goals of being an institution of inclusiveness and diversity. We are requesting funding through the SOF event grant in order to effectively present Korean culture in a way that is fun and engaging for the BC community. We want to make our second Korean festival as great as the first was so that future iterations of this event can be even better.
