

I would like to represent the institution that has helped put me on my career path. I would also like to assist students who are interested in college and need a support system to navigate the education system. I am people orientated, I enjoy meeting new people and connecting through shared ideas. I bring a unique point of view, and I am able to view situations from different perspectives to present new solution. BC has a student government to serve the institution, the staff, and most importantly the students. The government exists to make a student's college experience the best that it can be by providing services tailored to their needs.
