- COVID Team Activity
  - Blue pass approval: please give us 2-3 days
  - Red Pass Clearance
  - Contact Tracing
  - District COVID Protocol development
  - Testing and Immunizations

Communication Process for a classroom exposure

STRAND 1: covid19 email notification
- If a student sends you an email, CANVAS notification, or verbally tells you their testing, exposure, or symptom status, please email the information to covid19@bakersfieldcollege.edu. Include the student’s name/ BCID/ and Phone#. Cc the Department Chair and Director. This individual becomes person zero, for us.
- Ask the person to complete the “COVID Test Self-Report” or “Daily Health Checker” form in the KCCD App. The BC COVID19 Team
  - Calls person zero to determine details and provide instruction (contact tracing)
  - Follows up the conversation with an email detailing the conversation and instructions.
    - For an employee:
      - BCCOVID19 will notify/forward information to HR.
      - HR provides the supervisor with a generic statement “Jan Doe will be off until ‘x’ date.”
  - For a classroom/office exposure
    - BCCOVID19 will send a detailed email to the member/supervisor to send to exposed group (cc the Director and Chair). We ask that the Director/Supervisor send it because it is more likely to be opened/read.

- Closing the loop
  - BCCOVID19 sends an email to the director/supervisor with a generic statement that person zero can return to class on____. ONLY IF THE ORIGINAL COMMUNICATION CAME FROM SUPERVISOR.

STRAND 2: KCCD Campus Pass app notification
- The notification process originates with the app sending a notification to the BCCOVID19 team. This is the first step in the contact tracing process.

STRAND 3: Direct email to Jennifer Johnson or Nicky Damania
- Not a recommended notification method. This will result in no or slow response for a week at best.
