

I'm trying to become a senator because I want to help make decisions that will help all students on campus. I want to make sure that everyone's perspective is seen when making decisions about events on campus and how they will affect students short term and long term. I would make a great addition to the senate because I understand the importance of diversity and inclusivity. I also have been in leadership positions such as captain where I had to make decisions based on how it will affect everyone and I'd like to become a part of BCSGA and continue doing that.
