

# Letter of Intent: Harvind Grewal, Application to the Director of Legislative Affairs

**04/08/2022**

Dear President Barraji,

From joining the Bakersfield College Student Government Association (SGA) as a senator-at-large just a couple of months ago, I am proud and pleased to announce that I would be honored to put myself forward for the role of Director of Legislative Affairs. As a senator, I believe I have encompassed and involved myself with the actions, duties and responsibility that SGA requires from me, as it has allowed me sufficient and hands-on experience for fulfilling the duties of a responsible representative. By being able to have had this experience, I truly believe it will allow for a more smooth and solid transition into the becoming role of a director.

The SGA is an essential and vital to a place like Bakersfield College because it ensures to put the concerns, expressions and ideas of its students forth and gives students the priority on making decisions and forming discussions on several aspects to represent the best experiences and interests of the student body. Without a student government, we would lack the necessary means of having representatives that deal with day-to-day affairs concerning many things like safety, experience, finances and representation of various students. Thus, it enhances in the area of giving those in the government with skills which can be developed and broadened, but more importantly a voice to express our concerns and ideas.

My application to this particular role stems from my keen interest I have developed in the SGA to make my mark and set out a legacy for future students and knowing I will have left Bakersfield College doing something worthwhile and dutiful. Like all responsibilities and duties, I have had in my life, this is not something I will take lightly for it shall become an integral part of my academic and student government life.

The skills I possess are perfectly universal and adaptable to the suit the needs of the position of Director of Legislative Affairs because not only have they developed and become firmer, but my role as a senator has enhanced it to a much better level to know the ins and outs of the SGA. Skills such as engagement and communication are valuable in being appointed to this position because listening is key. Without listening, I don't think one can do much to act on their promises and create a legacy.

I am a firm believer in “Veni, Vidi, Vici”. These are the words spoken by a great man and they have resonated with me from a long-time; enough time to make it my motto in life with whatever I do and whenever I do it. My skills, dynamic outlook and approach to things will be the enhancing factor that will add to this part of the student government.

Sincerely,

Harvind S Grewal
