

Hunter Moore

April 21, 2022

Hello, my name is Hunter Moore. I am currently a sophomore and am majoring in Agriculture Plant Science. I really have a desire to join the Student Government Association (SGA) at Bakersfield College because I want to get more involved and really make a positive impact. I also want to give a voice to other students that I hopefully have the opportunity to represent in SGA, especially with emphasis on the agriculture community here at Bakersfield College. The skills that I have to be successful in any position I am needed include a willingness to listen, compromise, work with others, an open mind and a willingness to learn. I also hope to offer a unique perspective to SGA. I think student government is essential in all colleges and universities as it values the perspectives and concerns of students and allows student representatives to solve and help with those concerns by allowing students to govern and make decisions in their student government. With that being said, I hope that will have the opportunity to represent and make a significant impact in the lives of my fellow college students.

Sincerely,

Hunter Moore
